Wonderful Certification Exam Guide and Exam Dumps- PassLeaderVCE

Exam : A2040-440

Title : Assessment: IBM WebSphere Portal & Portal Products Fundamentals

Vendors : IBM

Version : DEMO

NO.1 Virtual Member Manager (VMM) is configured to leverage an LDAP server's membership attribute. The

LDAP server's membership attribute includes direct groups only. Access to IBM WebSphere Portal resources has been assigned based on nested group membership. What configuration options should be

changed or verified?

A. Change VMM membership attribute to scope "all".

B. Change VMM membership attribute to scope "nested".

C. Leave VMM membership attribute as scope "direct". Enable WebSphere Portal nested groups.

D. Leave VMM membership attribute as scope "direct". Disable WebSphere Portal nested groups.

Answer: C

NO.2 What special considerations exist for logging out users authenticated by an external security manager

(ESM)?

A. whether and how to expire the ESM's cookies

B. what role mappings to assign the default login portlet

C. how to clear the authorization context in the ESM's session

D. how to bypass the trust association interceptor during the logout

Answer: A

B. Generic Portlet 1.0

C. Portlet 2.0 (JSR 286)

D. Portlet 1.0 (JSR 168)

E. IBM Web Content Manager Portlet 1.0

F. IBM Web Experience Factory specification 1.5

Answer: A,C,D

NO.4 An administrator creates a page and denies access to anonymous users. The friendly URL for this page

is /wps/myportal/page1. J2EE authentication is enabled. Which default authentication level could be

associated with this page such that users who selected "Remember me on this computer" when logging in

previously will not be prompted for credentials when requesting /wps/myportal/page1?

A. Identified

B. Standard

C. Authorized

D. Authenticated

Answer: A

NO.5 What is one thing to check when troubleshooting friendly URLs?

A.If a web content viewer is not configured to broadcast links, links rendered by the viewer will affect the

friendly URL for web content.

B.Support for friendly URLs for web content is only enabled when either of the configuration properties

friendly.enabled or

friendly.pathinfo.enabled has a value of true in the portal Configuration Service.

C.It does not matter if the target page does not contain a web content viewer that is configured to receive

links. The content item specified in the

friendly URL for web content will be displayed either way.

D.The portal page specified in the friendly URL for web content must contain a content mapping to an

existing web content site area.If there is no

content mapping on the page, any web content viewers on the page display a warning message about the

missing page context.

Answer: D
